

Tyranny and Eugenics through Public Health, Bioterrorism, and Vaccines

<https://janaesp.com/bioterrorism-eugenics>

Part 10 – Vaccines Exposed

Watch Part 10 (captions available): <https://muse.ai/e/PfFERzE>

Watch Part 10 without music: <https://www.bitchute.com/video/I7gXmQF19WF4/>

Biotech Dangers

In Part 9, we started to show the direction of biotech, nanotech, synthetic biology, genetics, and micro-robotics which is towards merging man's physical body with machines, computers, AI (artificial intelligence) and the internet through microchips, nano-sized digital devices, and biometric sensors, all under the guise of "medicine".

The satanic worldview behind this is transhumanism and is the endgame of scientism, the basis for our scientific dictatorship that is being revealed through medical tyranny.

Even though technology has in certain ways enhanced human capacities—it is also killing and enslaving us...

Could technology enhance human capacities in a sustainable and evolutionary way? Yes! But only when scientific invention comes from philosophical and spiritual first principles of higher consciousness as to be aligned with the laws of nature and morality!

Collectively, our entire scientific paradigm is based on lower consciousness of war and government of the military industrial complex, eugenics, bioterrorism, population control/reduction, and the creation of modified humans 2.0.

"Do you really want to go to go to humans 2. 0? I don't think it's the fantasy you see in the movies. People in positions of power taking care of our health are not in our best interest." -Dr. Carrie Madej

Technological innovations are based on resolving man-made diseases caused by our technological-industrial bioweaponized society! Disease is one of the greatest commodities and political tools in our world that fulfills both capitalist and socialist agendas leading to further human enslavement.

But even common sense shows that putting foreign (non-nutrient) substances in our body, biological, nano, chemical and otherwise will (when detected by the body) produce an immune response—and that response can bring a life of physical pain and suffering and even death.

This is why vaccines are the principal use for these technologies because they are successful in creating an immune response something of which any poison would elicit. We shall see that an immune response has very little to do with actual immunity towards a disease.

We saw how nanotechnology came from the U.S. Government and defense departments and is being used in vaccines and openly in the COVID-19 vaccines; we discussed the toxicity of nanoparticles in general for human health as they can cause cancer, disease, organ impairment, and cross the blood-brain barrier causing neurological issues like Alzheimer's...

Here we can see one of the vaccine companies, Moderna connected with Merck, DARPA, and the Bill and Melinda Gates Foundation.

<https://www.modernatx.com/about-us/moderna-facts>

DARPA and Bill Gates are also involved the creation of injectable hydrogel smart biosensors with the tech company Profusa, as Silicon Valley is integrated with the military.

Recently Columbia University announced its creation of the World's Smallest Injectable Chip:

<https://www.popularmechanics.com/science/health/a36503099/worlds-smallest-implantable-chip/>

Vice came out with a video celebrating the announcement, while making sure to debunk conspiracy theorists for their claims that the COVID vaccine is connected to this.

Video: Scientists Are Developing Injectable Microchips... But not for vaccines

<https://youtu.be/mdwVaPBpks0>

(From Vice) "In some areas of life bigger is better but when it comes to microchips small is boss. In May, a team of engineers at Columbia announced a new implantable medical microchip, so tiny it can be injected into human body with a syringe. It's about the size of a single grain of salt. You can see the chip here being tested inside, yes, that's a raw chicken breast. So what exactly could an implantable device that miniscule actually do? The Columbia team hopes one day chips like these could detect the spread of cancers or monitor one tiny area of the body measuring the presence of a particular enzyme or biomarker. "

Professor: "In this particular paper, we were just measuring temperature, which is a relatively easy thing to measure in a solid state device, but you can imagine, uh, measuring all kinds of things."

Vice narrator: "Though the conspiracies may be frustrating, the team behind the injectable microchips say they won't let them get in the way of their progress."

(Professor) "I mean, we can delay publishing our stuff because we're worried that some crazy somewhere is gonna think that this is part of a conspiracy. "

The scientists behind the microchip explain that it can *only* be connected to ultrasound and never wireless internet to debunk "conspiracy theorists," making it seem as if the idea of microchip vaccines is unfounded.

Yet, look at this article from 2012: *Microchip Vaccine Delivery - No Longer a Thing of the Future* from MIT. <https://vgxii.com/news/microchip-vaccine-delivery-no-longer-a-thing-of-the-future/>

We know that nanoscale devices, smaller than this chip are being created and used to connect to the internet.

This article *The Internet of bio-NanoThings* is about "biologically embedded computing devices" ... "for the exchange of information, interaction, and networking within the biochemical domain, while enabling an interface to the electrical domain of the internet."

Article: <https://mbite.unl.edu/files/papers/2015/j1.pdf>

The article says that:

"the properties of recently studied nanomaterials, such as graphene, have inspired the concept of the Internet of NanoThings, based on the interconnection of nanoscale devices."

Graphene is being discussed as "an attractive material for the implementation of multifunctional brain implantable devices."

Article: *Graphene-Based Sensors for Human Health Monitoring*

<https://www.frontiersin.org/articles/10.3389/fchem.2019.00399/full>

Graphene oxide is oxidized graphene that is soluble in water and is much cheaper than graphene; it can be mixed with polymers, nano, and other materials while still retaining some of the properties of graphene.

In June 2021, a group of Spanish scientists in a group called Quinta Columna detected graphene oxide in the aqueous suspension of a single vial of Pfizer's vaccine, which consists of six doses. In the future, they will attempt to analyze more samples, but it is conclusive that 98-99% graphene oxide is in this one sample, as verified by different detection methods against a standard.

<https://www.scribd.com/document/515016039/LaQuinta-Coumna-Report>

Why was this substance tested? Here Ricardo Delgado Martin discusses that it was the magnetism being seen in people who had taken the shots that inspired the test.

Here is Dr. Martin speaking on behalf of the Spanish research team about their findings:

<https://theirishsentinel.com/2021/08/10/video-graphene-oxide-a-toxic-substance-in-the-vial-of-the-covid-19-mrna-vaccine/>

Martin: "First off Michel, thank you for the invitation. Indeed from the evidence of the magnetic phenomena that was occurring in the inoculated people, we began to suspect and raise hypothesis about what kind of injected nanomaterials that could provoke this magnetism... that would turn people into superconductors, having the ability to store energy. This is when we came across graphene. Therefore, at the moment we became aware of the existence of a vial which fell into our hands, we asked the University of Almeria through the mediation of Dr. Campra Madrid, Pablo Campra Madrid, doctor in chemical sciences and Bachelor in biology, to perform an analysis of the vial. And a week later the analysis came directly to us, and here you have it with his digital signature, as an accredited professor at this university where clear evidence of graphene oxide in the sample through analysis of TM electron microscopy, optical microscopy as well, C - analysis, and some spectroscopic techniques. Evidently from that moment on we began to study the toxicity caused by this graphene oxide in the organism. And we realized that, presents almost the same clinical picture as the COVID-19 disease itself. In other words, graphene oxide generates thrombogenicity, thrombi is a coagulating factor, causes platelet reduction, causes oxidative stress when toxicity increases, and with it, it triggers an alteration of immune system and thus triggers collapse of the immune system, cytokine storm, inflammation of mucus membranes by inhalation, lose of taste, lose of smell. We are talking about the classic COVID-19 picture."

Toxicity of graphene-family nanoparticles: a general review

<https://particleandfibretoxicology.biomedcentral.com/articles/10.1186/s12989-016-0168-y>

This paper discusses the destruction to the body by GFN including physical destruction, *oxidative stress*, DNA damage, inflammatory response, apoptosis, autophagy, and necrosis."

Graphene oxide has electronic, optical, optoelectronic, and thermoelectric properties that can be used as "transparent flexible conductors, field-effect transistors, electrical and optical sensors," and more.

Article: *Physical properties and device applications of graphene oxide*

<https://link.springer.com/article/10.1007/s11467-019-0937-9>

It has been used for making microchips:

Article: *A 3D graphene oxide microchip*

<https://pubs.rsc.org/en/content/articlelanding/2015/nr/c5nr04798f>

Ex-Pfizer employee/whistleblower, Karen Kingston, with over 20 years of experience in Big Pharma, has shared the Chinese patent of graphene oxide being a carrier for the nanocoronavirus.

<https://freeworldnews.tv/watch?id=610b15ec4b401c2c26621b15>

Patent: *Nano coronavirus recombinant vaccine taking graphene oxide as carrier*

<https://patents.google.com/patent/CN112220919A/en>

It states that "this invention belongs to...the development of 2019-nCoV coronavirus nuclear recombinant nano-vaccine." Kingston claims that graphene oxide is not listed in the ingredients as a trade secret because it is a well-known toxin and is attached to the PEG (polyethylene glycol).

PEGs are conjugated with the lipid nanoparticles acting as the protective shell coating for the mRNA in the COVID-19 vaccines. (We will talk about the mRNA later.)

The use of PEGs as a drug delivery system is questionable given that there are "life-threatening side effects" in its use.

Article: *The Importance of Poly(ethylene glycol) Alternatives for Overcoming PEG Immunogenicity in Drug Delivery and Bioconjugation*

<https://pubmed.ncbi.nlm.nih.gov/32024289/>

Article: *Toxicity and immunogenicity concerns related to PEGylated-micelle carrier systems: a review*

<https://www.tandfonline.com/doi/full/10.1080/14686996.2019.1590126>

This article talks about how PEGylated nanoparticle carriers can accumulate "as a cytotoxic agent in

specific organs, such as the liver and spleen, [and] may cause serious side effects.”

The Pfizer and Moderna vaccine are the first to use PEG despite the fact it has been shown to be harmful to human health and may be a main cause for the cases of anaphylaxis.

<https://onlinelibrary.wiley.com/doi/10.1111/cea.13874>

PEG decorated or grafted with graphene oxide is being used as a drug-delivery system for vaccine contents and other pharmaceuticals.

<https://www.sciencedirect.com/science/article/abs/pii/S0266353819336371>

This article *Nanomedicine: A Diagnostic and Therapeutic Approach to COVID-19* discusses “Nanoparticles for Drug Delivery and Vaccines,” promoting the use of graphene oxide nanoparticles as vaccine adjuvants.

<https://www.frontiersin.org/articles/10.3389/fmed.2021.648005/full>

Article: *Graphene Hydrogel Could Help mRNA Vaccine Target Cancer More Effectively*

This article in February 2021 claims that “a specialized graphene oxide hydrogel can help stabilize therapeutic mRNA cancer vaccines...and that “before the pandemic both Moderna and BioNTech had a focus on developing cancer vaccines.”

There is evidence to suggest that this hydrogel is part of the covid-19 vaccines.

Here is the Moderna patent for the vaccine, published in July 2020. In section 219 it discusses using “semi-conductive and metallic nanoparticles and then “gels and hydrogels”... saying, hydrogels are a network of polymer chains that are hydrophilic and sometimes found as a colloidal gel in which water is the dispersion medium...the hydrogel described herein may be used to encapsulate lipid nanoparticles...”

Moderna patent: *Modified Polynucleotides for the Production of Secreted Proteins*

<https://www.modernatx.com/sites/default/files/US10703789.pdf>

While the graphene oxide is electronic, the soft flexible hydrogel is what allows the metal to interface with the body providing biocompatibility.

In this paper it says that implantable hydrogel electronics can be connected to the Internet-of-Things.

<https://onlinelibrary.wiley.com/doi/abs/10.1002/adma.201902783>

“On April 2, 2021 Health Canada acknowledged “the presence of graphene nanoparticles inside the face mask manufactured in China, allegedly to protect our health as well as prevent the spread of the 'deadly virus'.” Yet these graphene particles cause severe lung damage.

Article: *Face masks Contain Graphene, A Poisonous Substance*

<https://www.globalresearch.ca/face-masks-contain-graphene-a-poisonous-substance/5749855>

Companies are openly putting silver nanoparticles in the masks as well.

<https://www.centerforfoodsafety.org/blog/6201/know-the-health-risks-before-investing-in-an-antimicrobial-nano-silver-mask-and-what-to-buy-instead>

People are finding those morgellons fibers that we talked about at the end of Part 9 in the face masks. These fibers aren't nano-related (as you can see them) but related to synthetic biology.

<https://truth11.com/2021/03/28/nanowires-that-move-in-masks-visible-by-the-naked-eye/>

Many doctors, scientists, and professionals are coming forth to warn of the dangers of the vaccine despite the censorship of mainstream media.

The spike protein created by the vaccine contents and one's cells has been declared a toxin that can enter the brain and create brain damage. There is also the issues of blot clots, heart damage/failure, lung damage, and miscarriages.

Video: Dr. Ryan Cole On COVID Vaccines, "This is a Poisonous Attack on our Population and it Needs to Stop Now"

<https://healthimpactnews.com/2021/dr-cole-on-covid-vaccines-this-is-a-poisonous-attack-on-our-population-and-it-needs-to-stop-now/>

Dr. Cole: "The spike IS the toxin so again why are we injecting something into the human body that is the toxin... it is the toxin, it causes the disease. This is no longer good science, this is a poisonous attack on our population and it needs to stop now!"

Interview with Former Pfizer Employee Karen Kingston

<https://freeworldnews.tv/watch?id=610b15ec4b401c2c26621b15>

Kingston: "I thought I would just start investigating more the data that I could find online from the FDA filing as well as, um, some of the studies that were done to just prove that it wasn't necessary for children to get injected. And when I found the patents, I was very alarmed because they don't read as a vaccine, they read as a bioweapon, basically."

Stop the Shot Part III: Vaccine Injuries & FDA 'Approval'

<https://freeworldnews.tv/watch?id=61279a2dabc8646db85df3d4>

Dr. Violet: "Our next speaker is a hospitalist-physician assistant in New York and what what have you been seeing? What are they experiencing? What are they suffering from when they come in?"

Conrad: "People seem to have some underlying medical conditions and then they get their vaccine and then it makes them jump off a cliff, so to speak. So if somebody has, um, say they have, you know an underlying, maybe liver disorder, they drink or something like that and then they get their vaccine, all of a sudden they're liver enzymes will go crazy and they'll end up with with liver failure. Or if they have diabetes and they have a little bit of kidney impairment, they get their vaccine and all of a sudden they get hyperglycemia and they get kidney failure."

"We're seeing a lot of sepsis, that's one of the big things. It's like your immune system isn't working anymore and people are getting repeated episodes of sepsis. Women who have never had urinary tract infections in their life are coming in repeatedly in the hospital with sepsis and UTIs, I don't get it. These are young women.. and people will say that's coincidental, people get UTI's all the time. But not young women requiring hospitalization with bacteremia over and over and over again. It seems like these antibiotics don't work."

"We're seeing blood clots... uh... it's it's funny I just said the other day it seems like our our anticoagulants are no longer working suddenly in 2021. We're getting people coming in with pulmonary emboli and full anti-coagulation... It's crazy, we've been seeing that actually quite often."

"Strokes... um what we call um idiopathic strokes. We don't have any other cause and they're having strokes. Heart attacks, non-ischemic cardiomyopathy are big ones... We're getting cardiomyopathy which is just huge. Appendicitis... we're seeing over and over and over again in the hospital and especially immune system issues. People are coming in with new autoimmune conditions. We've had a couple of cases of mesenteritis, autoimmune mesenteritis. I've never seen that in my career. We had two gentlemen come in with acute AML, acute myeloid leukemia back to back one day apart. I mean we're we're seeing weird weird things and there's no there's no rhyme or reason. It could be it could be a couple of weeks after vaccination, it could be six weeks after vaccination, it could be months down the road."

Dr. Violet: "And this is all escalated since the vaccines were rolled out, it wasn't something you were seeing last year during covid?"

Conrad: "No absolutely not... and it's, it's hard because during covid our hospitals generally were empty. I mean people were afraid to come to the hospital, you know, except for obviously the covid people. So that kind of was the the reasoning we were all saying initially. We're like, oh well people were sick and they didn't seek health care so now they're coming with all their problems. Well, now we're well far from that, I mean we're going into September now and we're still seeing these issues. Our hospitals are full... I actually wrote four, two or four letters—actually four letters, I want to say, to the FDA and actually spoke with them back in March when all this started happening... and I kind of told them, we're seeing unprecedented amounts of patients in the hospital with problems, can you please tell me what am I seeing, what am I supposed to be doing, who do I report to, how far out do I

report and I heard nothing back. And nobody's helping these vaccinated people who are potentially injured, nobody. They're calling them crazy, that they need psychiatric care, that they have anxiety that that it's coincidental but what if it's not?"

Breaking Mega Bombshell! Top FDA Scientists Warn Covid Vaccines Are Poisoning Adults and Children – Alex Jones

<https://freeworldnews.tv/watch?id=613159e5bc8dbd043fe4b40c>

Dr. Lee Merritt joins the Health Ranger to discuss vaccine MIND CONTROL and medical madness

<https://www.brighteon.com/47c07826-ebc8-4826-95ba-bdd6ab13d708>

Dr. Lee Merritt: If you want my actual worldview... I believe that we're at war and that this is a takedown of Western civilization if not humanity so that it's an attack on us as humans, against... they're coming after us, they're coming after our children and they want us dead or sterilized.

There is much to discuss about the COVID vaccine and still about the pandemic in general as well as dangerous biotechnologies and our transhumanist future, but first we need to really get into the topic of vaccines, their history, safety, and efficacy.

Many awake to the global agenda reiterate that the COVID-19 vaccines are not vaccines, that they are experimental gene therapy, and while will we look into how harmful gene therapy actually is, many fail to recognize that any foreign contents injected into the body that are not nutritious will always be an act of harm whether the consequences are noticeable or not and we shall discuss WHY.

Those who have freed themselves from the mind-control of the corrupt medical institution to be able to acknowledge vaccine harms, usually do not understand that *all vaccines are harmful...* and until we get to that level of understanding, any harm recognized will only stimulate greater nefarious "regulations;" regulations that would only empower the industrialized state.

This is what government regulations look like:

Video/Article: FDA Approval of Pfizer Vaccine

<https://www.cnn.com/2021/08/23/health/fda-approval-pfizer-covid-vaccine/index.html>

News: There is big news on the vaccine front. Today the FDA granted full approval for the Pfizer Code Vaccine for people sixteen and up. It had been approved for emergency use since December but now this means more places can start mandating that people get it.

News: President Joe Biden used the announcement to argue for more vaccine requirements. Biden: If your a business leader, a nonprofit leader, a state or local leader, who has been waiting for full FDA approval to require vaccinations I call on you now to do that, require it. Reporter: The pentagon was quick to follow the president's lead. Pentagon: The department is prepared to issue updated guidance requiring all service members to be vaccinated.

Those who think government regulations are the solution to vaccine problems and injuries don't know that government has been in bed with the vaccine industry since its inception in military bioweapons labs like Ft. Detrick... all the way to legal mandates... as a eugenics operation.

Those who think government regulations resolve issues of the private industry fail to see that government enables that corruption through public-private partnerships; for man's law protects corporate evils rather than being absent to them as they serve tyrannical agendas.

The vaccine industry is heavily regulated and protected but just not in the interest of the people—as government has never been and never will be “for the people” but an oppressive system of domination for the elites.

This isn't a take over but something that has been planned for hundreds of years; what has been operating in the shadows is now coming into the light.

Autism and the MMR Vaccine

Video: 60 minutes Australia episode on Autism: <https://youtu.be/ZqizB87kkhc>

Reporter: "It's a daily struggle for his parents to simply reach their son who they've lost to autism."

Father: "He's just uh, he just sits, just sits there or spins around and just not communicating at all. He's like a zombie."

Reporter: "The difference is startling. Flore and Grant Hume say this home video of her son shows a bubbly toddler developing normally."

Flore: "Ah, he's the most interactive little boy."

Grant: "He was so playful, yeah. he was always running around running up to you hugging you."

Flore: "Within two weeks of the MMR injection he, he had such a profound change of his personality."

Grant: "Language use, couldn't use, his speech really dropped off."

Reporter: "There are thousands of parents who are all saying the same thing, that the triple vaccine MMR is to blame for their children's autism. Both Terry and his older brother Michael have been diagnosed with high functioning autism. Their parents, Isabel and Ian Thomas haven't had a good sleep in a long time. It's like this day and night."

Isabel: "Sit down to eat, Michael."

Reporter: "But again their parents say as toddlers they were developing normally."

Isabel: "When Terry was walking when he was ten months old, Michael was talking fluently at the age of two."

Reporter: "What happened to your boys?"

Isabel: "We lost them, we lost our boys and we were given two boys the same outward body but inside different and that was after we had them vaccinated."

Autism or autism spectrum disorder is a group of neurological disorders that cause impaired communication and speech, challenges in social skills, and restrictive and repetitive behaviors.

Before the mass vaccination program on infants and children, there was a 1 in 10,000 chance of getting autism; today 1 in 36 children will get autism.

<https://harkla.co/blogs/special-needs/autism-statistics>

One of the most publicized vaccine cover-ups has been concealing the link between the MMR (measles-mumps-rubella) vaccine and autism.

The MMR vaccine contains the attenuated (weakened) live measles, mumps, and rubella viruses.

This chart shows the incidence of autism with usage of the MMR vaccines... but this Harvard report claims this is only correlation and not causation.

<http://www.hcs.harvard.edu/~hsr/wp-content/themes/hsr/pdf/fall2008/18-20%20vaccines.pdf>

In 1998, Dr. Vijendra Singh with the University of Michigan co-authored a paper reporting the presence of viral antibodies in autistic children. These antibodies attack the brain by targeting the basic building blocks of myelin, the insulating sheath that covers nerve fibers. Singh hypothesized that this autoimmune response may be the cause of autism.

<https://www.sciencedirect.com/science/article/abs/pii/S0090122998945883?via%3Dihub>

In 2002, Singh and others reported that 75 out of 125 autistic children had measles-mumps-rubella antibodies suggesting "a strong association between MMR and CNS autoimmunity in autism."

<https://link.springer.com/article/10.1007/BF02256592>

This connects with our discussion in Part 9, where we looked at the connection between demyelinating disease and vaccine autoimmune response, including polio, atypical polio, chronic

fatigue syndrome, multiple sclerosis, fibromyalgia, and guillian-barre.

In 1993, British surgeon and gastroenterologist Dr. Andrew Wakefield and others found measles virus RNA in the intestinal tissues of those with Crohn's disease, an inflammatory bowel disease.

<https://pubmed.ncbi.nlm.nih.gov/8492105/>

Wakefield had later discovered that children with autism had mild to moderate inflammation of the lymph glands in the intestinal lining, predominately small intestines, which he would later call *autistic enterocolitis* to differentiate it from other gastrointestinal illnesses.

In 1998, Wakefield and others published a paper in Lancet assessing and profiling 12 of his patients with this pattern of symptoms. He concluded that "the consequences of an inflamed or dysfunctional intestine may play a part in behavioral changes in some children."

[https://www.thelancet.com/pdfs/journals/lancet/PIIS0140-6736\(97\)11096-0.pdf](https://www.thelancet.com/pdfs/journals/lancet/PIIS0140-6736(97)11096-0.pdf)

While this paper did not show an empirical connection between the MMR vaccine and autism, Wakefield did mention that 8 parents of his 12 patients informed him that the onset of developmental and gastrointestinal symptoms occurred post MMR vaccination.

In that 1998 paper, Wakefield provided other research that showed the likeliness of a link, such as the work of Sudhir Gupta.

<https://pubmed.ncbi.nlm.nih.gov/8863094/>

This link was also made earlier in 1995 by Miller and Renton:

Measles vaccination as a risk factor for inflammatory bowel disease

<https://pubmed.ncbi.nlm.nih.gov/7619149/>

Nonetheless, the 1998 Lancet paper was so controversial, Wakefield was asked to leave the Royal Free Hospital where he worked; so in 2001 he came to the U.S. to continue his research to empirically verify the potential link between the MMR vaccine and autism.

In 2000 and 2001, Wakefield and others published papers revealing the detection of the vaccine-strain measles virus in patients with autism and inflammatory bowel disease.

Detection and sequencing of measles virus from peripheral mononuclear cells from patients with inflammatory bowel disease and autism, 2001

<https://pubmed.ncbi.nlm.nih.gov/10759242/>

Potential viral pathogenic mechanism for a new variant inflammatory bowel disease, 2001

http://pop.h-cdn.co/assets/cm/15/06/54d1502191875_-_1_0181.pdf

In this paper, the data confirmed "an association between the presence of measles virus and gut pathology in children with developmental disorder."

In 2010, Wakefield's Lancet article was retracted and he was banned from medical practice in the UK. His reputation was slandered by journalist Brian Deer from the British Medical Journal. There was certainly a conflict of interest as the British Medical Journal had signed a partnership in 2008 with Merck, the inventor of the MMR vaccine.

<https://ahrp.org/bmj-lancet-wedded-to-merck-cme-partnership/>

Wakefield has been defended by other doctors such as this article:

The Dishonest Persecution of Andrew Wakefield: Over 50 scientific references say this important issue shall not be censored any longer by Ralph K. Campbell M.D.

<http://orthomolecular.org/resources/omns/v15n06.shtml>

The MMR vaccine and autism: Sensation, refutation, retraction, and fraud

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3136032/>

In 2010, Wakefield wrote *Callous Disregard* (the terms used by the General Medical Council towards Wakefield to end his medical career when falsely claiming he abused his patients). The forward is written by actress Jenny McCarthy, a parent of a vaccine injured autistic child.

Andrew Wakefield also wrote *Waging War on the Autistic Child* in 2012.

He went on to direct the 2014 movie *VAXXED: From Cover-Up to Conspiracy*, co-written by Del Matthew Bigtree and others.

Interview with Del Bigtree: <https://youtu.be/i4IKBP6FBbQ>

Bigtree: "In pursuit of following the story by Doctor William Thompson I met Doctor Andrew Wakefield who was the one who was already making a documentary about Thompson, the CDC whistleblower. I had to make sure that it wasn't just aligning myself with someone that was the fraud that they said he was. And in that investigation of Andy looking into the story about the Lancet paper in the original statements that he'd made about the MMR Vaccine and it's potential cause or a causal relationship to autism. I mean mean the story falls apart immediately. The story I heard through the press, the story that we sort of repeated in medical journalism over and over again just fell apart before my eyes simply reading the Lancet paper."

VAXXED is about Dr. William Thompson, senior scientist at the CDC and co-author of many vaccine safety studies, Thompson contacted Brian Hooker, a CDC critic and parent of an autistic child, who Brian claims developed autism after the MMR shot. In over 40 phone conversations, some of which Hooker secretly recorded, legally in the state of Oregon, Thompson confessed to the fraudulent activities of the CDC, deliberately covering-up and altering data.

Two particular studies showed that the MMR vaccine causes autism in those with "isolated autism" cases, and is particularly susceptible to African Americans boys but the data was omitted to claim there was no link or increased incidence.

<https://pubmed.ncbi.nlm.nih.gov/14754936/>

Brian Hooker published a re-analysis of the CDC's data which showed that African American children have a 340% increase of autism following the MMR vaccine, which was of course retracted.

Measles-mumps-rubella vaccination timing and autism among young African American boys: a reanalysis of CDC data.

<https://translationalneurodegeneration.biomedcentral.com/articles/10.1186/2047-9158-3-16>

Article: *CDC Data Manipulation Exposed: Four Years Later by Brian Hooker.*

<https://www.jpands.org/vol22no4/hooker.pdf>

The 10,000 pages of documents, Thompson shared with Hooker, was also shared with Representative Bill Posey in 2014.

Congressman Posey Calling for Vaccine Safety Studies at the U.S. House of Representatives:

<https://healthimpactnews.com/2017/congressman-posey-lone-voice-in-congress-calling-for-vaccine-studies-comparing-vaccinated-with-unvaccinated-children/>

Posey: "In August 2014, Dr. William Thompson, a senior scientist at the Center for Disease Control and Prevention worked with a whistle blower attorney to provide my office with documents related to a 2004 CDC study that examined the possibility of a relationship between mumps-measles-rubella vaccines and autism. In a statement released in August 2004, Dr. Thompson stated, "I regret that my coauthors and I omitted statistically significant information in our 2004 article published in the Journal of Pediatrics."

Here is Thompson's statement regarding his part in omitting the data that showed a link between the MMR vaccine and autism: <http://vaccinesafetycouncilminnesota.org/wp-content/uploads/2015/02/Thompson-statement.jpg>

The VAXXED film regarding this story was going to be shown at the Tribeca Film Festival in 2016, but the founders of the festival were pressured to cancel the viewing. For co-founder Robert DeNiro this

was a regrettable choice as he wants everyone to see the film, having an autistic child.

<https://www.statnews.com/2016/04/13/de-niro-vaccines-vaxxed-autism/>

Reporter: "There was a bit of controversy some headlines at the beginning of this year's festival when it was announced that this film called VAXXED would be screened at the festival. Later the festival pulled it, was it because of the backlash, were you surprised that people reacted the way that they did?"

DeNiro: "I was shooting a movie, I was in the middle of a lot of stuff. I think the movie is something that people should see... There there's a lot of information about things are happening with the CDC, the pharmaceutical companies, there's a lot of things that are not said. I as a parent of a child who has autism I'm concerned and I want to know the truth and I'm not anti-vaccine. I want safe vaccines... There are many people who will come out and say no I saw my kid change like overnight. I saw what happened and I should have done something and I didn't... And for me to get so upset here today on the Today Show with you guys means something there. That's all I wanted was the movie to be seen, people can make their own judgment but you must see it. And there are other films and other things that also just document and show, you know, it's not such a simple thing."

Fortunately, they were able to show VAXXED at the Angelika Theatre in New York even sooner than they were scheduled at Tribeca. Afterwards, they toured the viewing all over the world and eventually bought an RV to be able to capture stories from the vaccine injured.

Dr. Suzanne Humphries, doctor and author of *Dissolving Illusions*, joined them. We will talk more about her and her book later.

At one time you were able to see the testimonies of many horrifying vaccine injuries on youtube, but their channel VAXXED TV has been removed, like many others.

VAXXED 2 Movie

<https://www.bitchute.com/video/Bt2pVLJcx1q/>

Polly Tommey, Producer of VAXXED: "I think my child had adverse reaction to those shots and then came the head banging, the constant banging against anything that he could find. We trusted our pediatricians, we didn't think to question. Well, so we did this and for my son had the MMR in the morning by the evening he was in hospital having a huge convulsion and we never got him back. He's twenty years old now and he is doing the best he can but he should be college. He's missed his childhood, he's missed his teenage years and the future is very bleak for people like Billy and he's one of millions, millions worldwide."

In 2012, two former Merck scientists/virologists, Stephen Krahling and Joan Wlochowski, turned whistleblowers, confessed to misconduct in the efficacy trials of the MMR vaccine. They claimed that data falsification was used to inflate the efficacy findings.

Two Lawsuits Accuse Merck of Lying About Vaccine Effectiveness

<https://healthimpactnews.com/2012/two-lawsuits-accuse-merck-of-lying-about-vaccine-effectiveness/>

Some other books that cover the CDC cover-up on vaccines are *Vaccine Whistleblower* by Kevin Barry (his website: <https://firstfreedom.org>), *Inoculated* by Kent Heckenlively, and *Master Manipulator: The Explosive True Story of Fraud, Embezzlement, and Government Betrayal at the CDC* by James Ottar Grundvig, parent of an autistic child like Heckenlively.

It is very revealing that the original insert for the MMR vaccine included autism as a potential adverse reaction and then it was removed. (*Vaccines: The Biggest Medical Fraud in History*, 2018 p. 48)

Here is another package insert for Dtap, also listing autism as a possible side effect. (p.49)

Clip of Anthony Fauci regarding the MMR:

Fauci: "The most egregious of the false information is the issue of the association of the measles, particular measles - mumps-rubella and autism which was propagated by fraudulent information that came out of the UK years ago that has been debunked multiple times." Bullshit!

While Andrew Wakefield found the patented measles virus in the gut of autistic children; this virus has also been found in the brain.

In 1999, the measles virus was found in the brain of a baby who had encephalitis after the MMR vaccine.

Measles inclusion-body encephalitis caused by the vaccine strain of measles virus

<https://academic.oup.com/cid/article/29/4/855/451603>

Article: *Immune Activation: Vaccines and the Developing Brain* by Dr. Russell Blaylock

<https://static1.squarespace.com/static/56d36e9d86db43f4f77637c1/t/5d71054ecb38ee0001d352fc/1567688052350/Blaylock+on+vaccines+and+the+developing+brain.pdf>

Neurosurgeon Dr. Russell Blaylock discusses a study of the elderly dying from non-infectious causes showing that 20% of the brains contained the live measles virus and that 45% of the people autopsied had live measles virus in other tissues and that these viruses were highly mutated.

While some will say there is a natural measles virus (infecting the brain and tissues), there is no such thing as what has been tampered in the lab is always modified. This patent of an attenuated measles virus for vaccines claims the original measles strain was “derived from Edmonston strain which has been developed by Enders et al,” and that it was produced as “a result of successive series of passages through human kidney tissue culture, human amnion tissue culture, embryonated eggs, and chick embryo tissue culture.”

<https://patentimages.storage.googleapis.com/bc/8a/a0/a0dbea4635c4c5/US4211843.pdf>

Does that sound like a natural measles virus to you (that was attenuated) or simply more modification to something also cooked up in the lab?

As we have emphasized in this series, the virulent pathogen must be created before the vaccine pathogen.

Biologist Stefan Lanka was able to prove in the German courts in 2017 that there is not enough evidence that a natural measles virus exists, challenging germ theory.

Biologist Proves Measles Isn't A Virus

<https://cohlife.org/wp-content/uploads/Biologist-Proves-Measles-Isnt-A-Virus-Wins-Supreme-Court-Case-Against-Doc.pdf>

Ultimately, any vaccine substance can get into the brain and cause neurological issues whether that be mycoplasma, adjuvants, viruses, nanoparticles and other contaminants and once in the brain they cannot be removed as Dr. Blaylock shows. This causes the brain to produce microglia, excitotoxins, and cytokines, as an immune response which causes chronic brain destruction.

Viruses that lurk in the tissues can trigger the release of free radicals which are damaging to cells. Free radicals can cause previously benign viruses (attenuated viruses) to change their genetic expression, leading to a dramatic increase in their virulence, that can occur over a lifetime.

Mercury in Vaccines

CNN: Dan Burton and Anderson Cooper

<https://www.cnn.com/videos/tv/2015/02/05/ac-anderson-cooper-interview-with-dan-burton.cnn>

Dan Burton: “Mercury is toxic to the human brain and neurological problems have been caused by mercury and mercury should not be in vaccines. My grandson got nine shots in one day seven of which had mercury in it and he became autistic in a very short period time. We had scientists from around the world. Now I'm for vaccination.”

Anderson Cooper: “Tell me the name of the scientists who claimed this because they go against what every study I mean the CDC says this instance of health of all these studies say you're you're just wrong.”

Burton: “I'll I'll be very happy to provide those for you. I didn't bring them with me but I can tell you I was chairman for six years, three years we had these hearings and we did have those studies and

there's no question that many scientists around the world believe that the mercury in vaccinations is a contributing factor to neurological problems.”

From Shoot Em Up Documentary on Vaccines:

<https://www.bitchute.com/video/nUX13v67KH55/>

Parent: “Today I brought my son Will with me. He was exposed to one hundred and twenty five times the EPA's safe allowable limit for mercury at two months of age. I also found out that the products that I received when I was pregnant Rho(D) Immune Globulin products contained sixty five micrograms of ethyl mercury and it was directly injected at fourteen weeks and twenty eight weeks gestation. Will then received two hundred thirty seven point five micrograms postnatally. He went from a normally developing child into the tunnel or autism that we all know.”

Autism has been linked to ethyl-mercury in a product called thimerosal that is used as a preservative in several vaccines including diphtheria, tetanus, and pertussis, hepatitis B, and the flu shot.

Thimerosal has been found to break DNA, cause membrane damage, and cell death in cultured human neurons and fibroblasts. (Fibroblasts are the connective tissue that produces collagen and other fibers.)

Paper: *Thimerosal Induces DNA Breaks, Caspase-3 Activation, Membrane Damage, and Cell Death in Cultured Human Neurons and Fibroblasts*

<https://pubmed.ncbi.nlm.nih.gov/12773768/>

Thimerosal crosses the blood-brain barrier, is a neurotoxin, mitochondrial toxin, and damages the immune system.

Paper: *Examining the evidence that ethylmercury crosses the blood-brain barrier*

<https://pubmed.ncbi.nlm.nih.gov/31841767/>

Paper: *Thimerosal-Derived Ethylmercury Is a Mitochondrial Toxin in Human Astrocytes: Possible Role of Fenton Chemistry in the Oxidation and Breakage of mtDNA*

<https://www.hindawi.com/journals/jt/2012/373678/>

Thimerosal Linked to Immune System Dysfunction

<https://www.sciencedaily.com/releases/2006/03/060322183922.htm>

Thimerosal-Induced Neurotoxicity: Apoptosis Occurs Through A Mitochondrial-Mediated Pathway Via the JNK Signaling Pathway

<https://mds.marshall.edu/cgi/viewcontent.cgi?referer=&httpsredir=1&article=1640&context=etd>

Robert Kennedy Jr., nephew of JFK, spent decades as a lawyer litigating polluters who dumped mercury into water systems as an advocate for the environment and became a vaccine safety advocate by accident—when information came his way about mercury being a problem in vaccines. He says he was skeptical until he reviewed the overwhelming evidence.

Kennedy initially put that information in a 2005 article: *Deadly Immunity – Government Cover-up of Mercury/Autism Scandal*.

<https://childrenshealthdefense.org/news/deadly-immunity-government-cover-mercuryautism-scandal-2/>

Later he published *Thimerosal: Let the Science Speak* in 2015.

In this 1999 document, Dr. Tom Verstraeten wrote a report that came to the conclusion that “increased risk of developmental neurologic impairment” occur “after high exposure to thimerosal-containing vaccine in the first month of life;” a conclusion reached after analyzing the medical data of 400,000 children.

<https://childrenshealthdefense.org/wp-content/uploads/Verstraeten-1999-Increased-risk-of->

[developmental-neurologic-impairment-after-high-exposure-to-thimerosal-containing-vaccine-in-first-month-of-life.pdf](#)

Dr. Verstraeten also presented his evidence at the CDC's (secretive) June 2000 Simpsonwood Conference, the transcript obtained by the Freedom of Information Act.

<https://childrenshealthdefense.org/wp-content/uploads/2016/10/The-Simpsonwood-Documents.pdf>

The conference consisted of government public health officials from the WHO, FDA, CDC and other institutions, vaccine manufactures like Merck/GlaxoSmithKline, and medical professionals. The purpose of the meeting was to do damage control and create phony studies to exonerate vaccines.

Dr. David Ayoub's presentation titled *Mercury, Autism, and the Global Vaccine Agenda* also quotes some highlights from the conference. (11:30-14 min)

<https://youtu.be/6VgZszilk7A>

Dr. Ayoub: "One pediatrician at the conference said 'the number of dose-related relationships are linear and are statistically significant. You can play with this all you want. They are linear. They are statistically significant,' in an argumentative frame of mind. 'This rise in frequency of neurodevelopmental disorders whether ascertainment or real is much too graphic. We don't see that kind of genetic change in 30 years.'"

"One authority from Michigan got out and left the room to call his son and say don't give our grandson a vaccine, his daughter-in-law was about to deliver. One of the CDC statisticians said, 'you can push, I can pull. But there has been substantial movement from this very highly significant result down to a fairly marginal result.' So they were manipulating the data as they were meeting to figure out how they could water this down."

"In a bizarre twist, the primary author when he presented the middle phases of the data to the Institute of Medicine announces, I just go hired by GlaxoSmithKline this morning."

According to Kennedy, "the CDC officials hired Scandanavian Poul Thorsen, giving him \$10 million to create a series of fraudulent reports from Denmark."

<https://childrenshealthdefense.org/news/government-corruption/fully-vaccinated-vs-unvaccinated-part-2/>

Even though Thorsen stole money from the CDC and is currently a fugitive, his false studies are the bedrock for the false claim that vaccines do not cause autism.

Thorsen's study: *A population-based study of measles, mumps, and rubella vaccination and autism*

<https://pubmed.ncbi.nlm.nih.gov/12421889/>

Hearing before the Committee on Government Reform, House of Representatives July 18, 2000

http://www.thinktwice.com/Merc_Med.pdf

In 2004, at a hearing to the House of Representatives, Dan Burton talks about how he has "convened in no fewer than 20 hearings" on the topic during which "numerous scientists from all of the world have testified"... presenting "credible, peer-reviewed research studies that indicated a direct link between the exposure of mercury, a widely known neurotoxin, and the increasing incidence of autism..." He reveals the contradiction that recently the EPA is "complaining about excessive mercury in our waterways" and how its linked to neurological disorders but that "we continue to inject it into our children..." despite the evidence.

<https://www.govinfo.gov/content/pkg/CHRG-108hrg98046/html/CHRG-108hrg98046.htm>

Thimerosal is around 50% ethyl-mercury and was added to vaccines in 1931 as preservative. Dr. Leo Kanner identified the new unknown mental syndrome of autism that appeared in a case from 1938 when vaccination programs were well under way. Coincidence? Of course not.

Paper: *Autistic Disturbances of Affective Contact* by Leo Kanner:

<http://simonsfoundation.s3.amazonaws.com/share/071207-leo-kanner-autistic-affective-contact.pdf>

The original manufacturer of thimerosal, Eli Lilly, knew from the start that it could cause damage, even death in animals and humans.

Video clip on Thimerosal from Vaccines Revealed:
<https://www.bitchute.com/video/FiRLknP5HQ89/>

David Geier (VP of institute of Chronic Illness): "The first thing to note about thimerosal was that it was patented by Eli Lilly scientists in 1927. So Eli Lilly did an experiment on humans as there was an epidemic of meningitis in Indianapolis, Eli Lilly is in Indianapolis, Indiana. One hundred and forty four people came down with bacterial meningitis infections of the brain. And what Eli Lilly did is take subgroup of those people and they exposed them to thimerosal in extremely high doses. It was a one percent solution. So they were giving doses to humans of thimerosal that were killing animals in the laboratory they gave it to them intravenous. And of the twenty two people, all of them died."

"Based on experience of giving these doses of thimerosal to these twenty two persons they said that thimerosal or merthiolate, they are the same thing, had a very low order of toxicity for man."

Tobacco Science and the Thimerosal Scandal by Robert Kennedy Jr.
http://www.gesundohnepillen.de/05_kennedy_tobacco_science_and_the_thimerosal_scandal.pdf

History of Eli Lilly:
https://childrenshealthdefense.org/wp-content/uploads/2016/11/Eli_Lilly_Discovery_Documents.pdf

Robert Kennedy writes (*Deadly Immunity*, 2005):

In the decades that followed, the evidence against thimerosal continued to mount. During the Second World War, when the Department of Defense used the preservative in vaccines on soldiers, it required Lilly to label it "poison." In 1967, a study in Applied Microbiology found that thimerosal killed mice when added to injected vaccines. Four years later, Lilly's own studies discerned that thimerosal was "toxic to tissue cells" in concentrations as low as one part per million — 100 times weaker than the concentration in a typical vaccine. Even so, the company continued to promote thimerosal as "nontoxic" and also incorporated it into topical disinfectants. In 1977, ten babies at a Toronto hospital died when an antiseptic preserved with thimerosal was dabbed onto their umbilical cords.

In 1982, the FDA proposed a ban on over-the-counter products that contained thimerosal, and in 1991 the agency considered banning it from animal vaccines. But tragically, that same year, the CDC recommended that infants be injected with a series of mercury-laced vaccines. Newborns would be vaccinated for hepatitis B within twenty-four hours of birth, and two-month-old infants would be immunized for Haemophilus influenza B and diphtheria-tetanus-pertussis.

Since 1991...the estimated number of cases of autism had increased fifteen-fold, from one in every 2,500 children to one in 166 children.

...In China, where the disease was virtually unknown prior to the introduction of thimerosal by U.S. drug manufacturers in 1999, news reports indicate that there are now more than 1.8 million autistics."

Video clip on Thimerosal from Vaccines Revealed:
<https://www.bitchute.com/video/FiRLknP5HQ89/>

Geier: There are hundreds maybe thousands of studies from the early nineteen thirties through the present that have called into question the use of thimerosal on every single kind of product. And a particular interesting one was in 1948, there were so many complaints, that the AMA the American Medical Association put together a blue ribbon panel to study what they should do and recommend about all these complaints they were published in the literature and Frank Engley was on that committee who is still alive today and maybe you get to talk to him and may have seen him."

Frank Engley, PhD (retired Chairman, Dept. of Microbiology of University of Missouri): "We found out that the thimerosal would be toxic down to not grams, not milligrams, not micrograms, but nanograms, parts per billion which is almost unbelievable. This was published in the American Journal Medical Society in the New York Academy Sciences and in the Journal for the Chemical Specialists

Manufacturers Association and it didn't make a wave. There wasn't a ripple. No one seemed to care."

From *Deadly Immunity*:

"You couldn't even construct a study that shows thimerosal is safe," says Haley, who heads the chemistry department at the University of Kentucky. "It's just too darn toxic. If you inject thimerosal into an animal, its brain will sicken. If you apply it to living tissue, the cells die. If you put it in a petri dish, the culture dies. Knowing these things, it would be shocking if one could inject it into an infant without causing damage."

Video: Mercury Toxicity and Neurological Diseases with Dr. Boyd Haley
<https://youtu.be/IHw2Fi2o7G4>

While 2ppb limit of mercury is allowed in water which is too much, there was 25,000 ppb of mercury in the hepatitis B shot given to newborns. This is 1,250,000 times the maximum safe limit. 50,000 ppb are found in the multi-dose shots, such as the multi-dose dTap and in the multi-dose flu vaccines. (p. 95, *Truth Will Prevail, 1200 Studies that Refute Vaccine Claims*)

The elderly are recommended to get the flu shot and there has been a rise in dementia Alzheimer's, and Parkinson's.

Pregnant women are also recommended to get the flu shot which can cause miscarriages and birth defects; vaccine-related chemicals/substances are known to cross the placenta and be passed through breastmilk!

Flu Vaccine and Miscarriages
<https://www.cidrap.umn.edu/news-perspective/2017/09/study-signals-association-between-flu-vaccine-miscarriage>

Not even the government can suppress all the scientific studies that have revealed the dangers of thimerosal-containing vaccines.

Increased Risk for an Atypical Autism Diagnosis Following Thimerosal-containing Vaccine Exposure in the United States: A Prospective Longitudinal Case-Control Study in the Vaccine Safety Datalink 2017
<https://pubmed.ncbi.nlm.nih.gov/28595786/>

In this 2013 study, thimerosal was tested on rats showing negative neurological adverse reactions. In the conclusions it talks about the likelihood of a connection between vaccines and autism.

Effect of thimerosal on the neurodevelopment of premature rats
<https://link.springer.com/article/10.1007/s12519-013-0443-z>

Just to show how politics are deeply connected to the pharmaceutical cartel, elder George Bush sat

on Eli Lilly's board of directors in the 1970s. Eli Lilly's CEO, Sidney Taurel was appointed by Bush Sr. to Homeland Security Advisory Council.

Nothing changes with politics as Trump elected former president of Eli Lilly, Alex Azar, to be the U.S. Secretary of Health and Human Services (of which he was appointed earlier under George Bush Jr.). Azar was also chairman of the White House Coronavirus Task Force.

As a side note: Eli Lilly created the controversial drug Prozac that has caused serious injuries including birth defects like autism, criminal behavior, and suicide... Many doctors have exposed the harms of psychiatric prescriptions. Book: Medication Madness: A Psychiatrist Exposes the Dangers of Mood-Altering Medications by Peter Breggin M.D.

<https://www.drugdangers.com/ssri/prozac/lawsuit/>

When discussing autism, we are discussing a spectrum of neurological issues from extremely mild to extremely severe (autism being the extreme). This contains a wide range of mental disabilities including speech, learning, memory, data processing, and attention (the spectrum of ADD/ADHD) problems, and even appetite, social, and emotional issues.

Just to show how the dark dialectic is used in the medical industry, now Eli Lilly has made a treatment for Attention Deficit Hyperactivity Disorder. It sells the problem (vaccines creating neurological disorders) and the solution—that will create more side effects for more drugs and more problems!

Aluminum in Vaccines

While the thimerosal controversy sparked its removal from some vaccines, it was never deemed unsafe by public officials and no regulation of its use ensued.

Besides being in some flu vaccines, thimerosal is also listed for a tetanus/diphtheria shot in the CDC's ingredient list.

<https://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/B/excipient-table-2.pdf>

While thimerosal was said to have been removed in the Hepatitis B shot, aluminum has taken its place; and some scientists claim that aluminum is seven times more toxic than mercury! (from *Truth Will Prevail*).

Aluminum is also in the hepatitis A, Diphtheria-tetanus (Dtap, Tdap), HPV (human papilloma virus), pneumococcal, and meningococcal B vaccines and more.

We've talked about the danger of aluminum nanoparticles, but aluminum salts are also harmful.

This paper *Neurotoxicity of Aluminum* states that “soluble aluminum salts can be absorbed by the stomach and the metal is deposited in the gray matter of the brain.”

<https://pubmed.ncbi.nlm.nih.gov/6207901/>

This study shows *Aluminum in the Brain Tissue of Autism*.

<https://pubmed.ncbi.nlm.nih.gov/29413113/>

The paper *Aluminum vaccine adjuvants: are they safe?* Says that they have the potential to “induce serious immunological disorders... autoimmunity, long-term brain inflammation, and associated neurological complications.”

<https://pubmed.ncbi.nlm.nih.gov/21568886/>

Autoimmune/inflammatory syndrome induced by adjuvants (ASIA) 2013: Unveiling the pathogenic, clinical and diagnostic aspects

<https://pubmed.ncbi.nlm.nih.gov/24238833/>

This paper *Aluminum in Childhood Vaccines is Unsafe* goes into history and evidence of the toxicity of aluminum saying:

In 1927, Dr. Victor Vaughn, a toxicologist with the University of Michigan, testified before the Federal Trade Commission that “all salts of aluminum are poisonous when injected subcutaneously or intravenously.”

https://www.researchgate.net/publication/311824598_Aluminum_in_Childhood_Vaccines_is_Unsafe

This paper shows that aluminum adjuvants in vaccines have been linked to multiple sclerosis, systemic lupus erythematosus, chronic fatigue syndrome, Gulf War syndrome, macrophagic myofasciitis, arthritis, and autoimmune/inflammatory syndrome..” also saying that “clinical symptoms associated with vaccines can take years to manifest.”

Other studies have shown that aluminum “inhibits more than 200 biologically important functions.”

According to the paper from 2016 “babies are injected with 1,225 mcg of aluminum instantaneously at age 2 months and 4,925 mcg of accumulated aluminum by age 18 months.”

Human Health Risk Assessment for Aluminum, Aluminum Oxide, and Aluminum Hydroxide.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2782734/>

Aluminum Used in Vaccines: Dr. Mercola's Interview with Dr. David Ayoub

<https://www.youtube.com/playlist?list=PLZxUTEnvnaTAW1FtmVu3rzghEd4gEAIYN>

Children can be given both aluminum and mercury from multiple shots in one day, but even in the course of time there can be a cumulative effect.

Dr. Boyd Haley published a study investigating the effect of combining aluminum hydroxide and thimerosal and he discovered that when combined they have a synergistic effect, which goes much beyond an additive effect. This means when combined they cause more neuronal death than the same amount individually.

Mercury toxicity: Genetic susceptibility and synergistic effects

<https://1796web.com/pdfs/haley.pdf>

We don't have time to cover all the toxic substances in vaccines. In Part 9, we discussed the viral and bacterial contaminants and non-listed contaminants.

Here is a short list, not exhaustive of course, of the witches' brew: animal pus, urine, blood, feces, bovine serum, aborted fetal tissue, human and animal cells, cancer cells, micro-organisms, GMO, genetically-modified yeast, modified animal and viral DNA, mycoplasma, nanobacteria, fungi... MSG, phenol/phenoxyethanol, beta-propiolactone, potassium chloride, vecuronium bromide, midazolam, tri(n) butylphosphate, borax (an ingredient in insecticide and rat poisoning), glutaraldehyde (found in nerve gas), ammonium sulfate (found in chemical fertilizers), latex, formalin, formaldehyde, ethyl glycol, acetone, flouridated water, monosodium glutamate, etc.

Rachel Celler: Forensic Nurse

<https://www.youtube.com/watch?v=dImBS816Jv8>

Nurse Celler: “And I will tell you today that these vaccines that they are making I the only thing I can think of calling it is witchcraft, medical sorcery.”

The combination of biological material and inorganic chemicals create a dangerously toxic brew, as biologics have the potential to enter cells and hijack their genetic functions while chemicals can impair cellular functions and movements.

The Vaccine Religion: Safety and Efficacy

We have gone into some detail about the MMR shot and thimerosal-containing vaccines to show government and pharmaceutical corruption in specific events, but the focus on one vaccine and one

chemical has been a distraction to the larger issue that all vaccine contents are dangerous and harmful and have negative synergistic and cumulative effects.

Now, most proponents of who the media calls “anti-vax” are actually not anti-vaccine, such as Judy Mikovits, Robert Kennedy Jr., Andrew Wakefield, Del Mathew Bigtree and others as they desire “safer vaccines.”

But anyone who has gone all the way and taken the vaccine red pill will know that no such thing exists such as Bret Wilcox author of *Jabbed: How the vaccine industry, medical establishment, and government stick it to you and your family* (2018). In the Afterword, he writes:

Calling for safer vaccines is a mistake. Doing so activates pharma-funded programming that effectively shuts down the capacity of otherwise reasonable and intelligent people to exercise critical thinking skills, leading them back to the moronic conclusion that the act of vaccination transforms toxic potions into magic elixirs of health and protection. Thus, the words “safe,” “safety,” and “vaccines” should never be uttered in the same sentence.

To break the spell, we must imbue the word vaccine with accurate meaning. We do that by calling vaccines what they are: poisons, toxins, contaminants, weapons, etc. What do that do? They poison assault, inflame, infect, bastardize, weaken, destroy, and kill.”

What are the ethics of the vaccine program? Greed, fraud, deception, and very likely mind control, infertility, eugenics, and world domination.

Messaging to vaccine believers should be succinct and bold. “Anti-vax and proud.” “Of course I’m anti-vaccine.” “Unvaxxed and unafraid.” “Vaccine free and healthy.” “The science is settled: vaccines injure and kill.” p.938 eBook

Many books contain the quotes of many doctors, scientists, and professionals with the same viewpoint... seeing the subject of vaccination as the greatest medical fraud perpetrated on humanity.

Vaccines: The Biggest Medical Fraud in History (Compilation of several books)

<https://archive.org/details/vaccines-the-biggest-medical-fraud-in-history-2018-e-book>

Now, in order to get to this level of understanding please follow this series to the end... as must go into vaccine history and myths and get to the bottom of germ theory and immunity.

But the fact that even the people who simply desire safer vaccines have been ostracized from society and censored from the media point to a bigger problem... and that is that modern medicine has become an authoritative religion.

Bret Wilcox Video: https://youtu.be/o7z8_ILh2Bw

Wilcox: “The word vaccine itself is a powerful word and that’s a that’s intended to be powerful... there’s been some powerful programming over the last forty or fifty or sixty years to turn that word, to give it some sort of mythological status and when people hear the word vaccine they’re higher critical thinking skills shut down and they automatically go into this this fight or flight complex where the vaccine is the savior. When people were more into religion they would use religious symbols and ordinances to protect them from evil spirits and nowadays that’s largely been replaced by secular people who now look to the medical establishment to heal them, to save them from from the evil spirits that are out there in the form of viruses and bacteria and whatnot. And when they hear the word vaccine, they get this bow down and worship... and critical thinking skills just turn off and the people that construct the vaccine paradigm have done that intentionally.”

In *Confessions of a Medical Heretic* (1979), Robert S. Mendelsohn shows how the methods of modern medicine are worse than the diseases they are designed to treat and diagnose. He talks about how flu shots are a farce.

In the book *Modern Medicine: The New World Religion: How Beliefs Secretly Influence Medical Dogmas and Practices*, 2004, Oliver Clerc writes:

“... physicians have taken the place of priests; vaccination plays the same role as baptism; the search for health has replaced the quest for salvation; the fight against disease has replaced the fight against

sin; eradication of viruses has taken the place of exorcising demons; the hope of physical immortality (cloning, genetic engineering) takes priority over eternal life...”

Just as the Catholic Church was the Roman government's ally, now the medical establishment is the ally of the New World Order—which is simply a global Roman empire.

There cannot even be a debate on vaccines as Dr. Sheri Tenpenny reveals.

Spiro Skouras Interviews Dr. Sheri Tenpenny (10 minutes)

<https://www.bitchute.com/video/VchiHoospEKY/>

Tenpenny: “I mean we've had multiple different times that we've tried to set up debates with them....And two weeks before where they we were supposed to have this event, everybody on the pro vaccine side decided, well they just didn't show up. And they said they got lots of heat from their employers because the standard argument is if we engage in a debate then that means there is something debatable and as far as we are concerned the science is done and they are tinfoil hat conspiracy theorists... And so what ended up happening is that we had the chairs sitting on the stage up there and it just said didn't show up on their side, and we just had the entire time to just talk as much as we wanted and tell everybody that was listening, what our side of the thing was. The guy who was the moderator, a black gentleman, very high level, said 'I don't know anything about vaccines. They just chose me to do this because I'm a local celebrity,' he said that 'after listening to you guys talk for the last two and half hours, he said man I'm never doing that flu shot thing again! I learned a whole lot that I really didn't even know about.' So they didn't [come]... and wouldn't you, if you were a pro-vaccine like zealot and you think that I'm just the biggest quack that ever existed and that I was absolutely anti-science and had no idea what I was talking about, wouldn't you just love to take the opportunity on a stage in a public forum that's being televised and going all over everywhere to put the heel your boot right on the back of the neck of Sherri Tenpenny? Just bury her to the stage, verbally speaking.”

Vaccine pseudo-science is a religion about dogma, blind faith, and obedience, where critical thinking skills and empirical evidence are not allowed and you will be socially ostracized for challenging the medical priests of the Rockefeller syndicate.

Even scientific empiricism from which vaccine theory is supposedly based on is about continually gaining new information and improving methods and being open to being wrong. But the mere questioning of vaccine safety automatically gives you the “anti-science” label.

<https://www.cambridge.org/core/journals/history-of-education-quarterly/article/abs/school-vaccination-wars-the-rise-of-antiscience-in-the-american-antivaccination-societies-18791929/644A4B07396044064EB819FD3B218075>

They say the “science is settled” but vaccine theory is always experimental as new chemicals and genes are being put into more and more vaccines added to the schedule creating novel toxic cocktails.

The first absolute dogmatic axiom of that religion is that “all vaccines are safe and effective.” But curiously, almost no one would ever say that “all drugs are safe and effective.”

Many people have been so brainwashed that they see vaccines as infallible and absolute in their virtue, as if they were the essence of God himself.

As Mark Twain said, “you repeat a lie loud enough and enough times, people will just automatically believe it.”

The mind-control works because people want to believe the lie and hide from truth so badly, which is why they defend their abusers and act illogically. People want to remain in a childlike naive state feeling protected by mommy and daddy government and not transition into adulthood and sovereignty.

“Orthodoxy means not thinking—not needing to think. Orthodoxy is unconsciousness.” -George Orwell

However, even orthodox government has declared vaccines as unavoidably unsafe—the worlds of the US Supreme Court in March 2011.

<https://www.supremecourt.gov/opinions/10pdf/09-152.pdf>

From *The Swine Flu Expose* by Eleanor McBean (PhD):

It is undeniably true that there has been deliberate suppression of information and fabrication of data to protect a multibillion dollar per year industry: the pharmaceutical/chemical/agribusiness/oil/biomedical research conglomerate. It is readily acknowledged by the author that this conditioning of public opinion has been so successful that some individuals are unable to accept information which contradicts conditioned beliefs about vaccination. (p.208 Greatest Medical Fraud)

From *The Poisoned Needle: Suppressed Facts About Vaccination* (1957) also by Dr. Eleanor McBean:

“VACCINATIONS ARE NOT SCIENTIFIC

Many of the world's greatest thinkers, scientists, statesmen and even doctors have condemned vaccination as being a crime against humanity, a fraud promoted for private gain, an insult to the race and a blot upon the name of civilization. Yet, this treacherous practice of blood pollution, which was cradled in the lap of ignorant savage tribes, has been adopted by, supposedly, enlightened government of the present day and forced on the protesting population—for profit.” (p.25)
<http://www.whale.to/a/mcbean.html>

"[Looking not only at vaccine research one must conclude that] our public health policies are not even remotely evidence-based. Rather, our public health policies are faith-based decrees by government 'authorities'-no better than voodoo medicine." -Vera Sharav Alliance for Human Research Protection (AHRP), *Virus Mania* p.261

The corruption of Big Pharma is no secret as they have paid out \$56 billion dollars in fines since 2000. All the pharmaceutical companies behind vaccines are convicted criminals.

<https://violationtracker.goodjobsfirst.org/industry/pharmaceuticals>

It is an absolute fact that adverse reactions occur as some of these reactions are even listed in the package insert of each vaccine. The insert also tells the doctor to provide this information to the patient and report adverse reactions. This rarely done because it contradicts the “safe and effective” motto, thus there is never truly “informed consent.”

MMR Vaccine Insert:

<https://www.fda.gov/media/75191/download>

What do the vaccine package inserts have to say about its safety?

Section 13.1 of all vaccine inserts says: vaccine has not been evaluated for carcinogenic, mutagenic potential or impairment of fertility.” (p.6)

<https://www.fda.gov/media/75191/download>

<https://www.fda.gov/media/133748/download>

<https://www.fda.gov/media/84804/download>

Sometimes Section 13.1 is absent.

Let's talk about VAERS, the Vaccine Adverse Reporting System.

In 2010, a report was published by the Harvard Pilgrim Health Care Institution titled: *Electronic Support for Public Health-Vaccine Adverse Event Reporting System (ESP:VAERS)* with the intention of improving the safety of vaccination programs by improving the reporting of adverse reactions. They found that “adverse events from drugs and vaccine are common, but underreported,” and that “fewer than 1% of vaccine adverse events are reported.”

<https://digital.ahrq.gov/sites/default/files/docs/publication/r18hs017045-lazarus-final-report-2011.pdf>

When the authors tried to contact the CDC or its officials to take their feedback to improve the reporting system, they did not want to engage.

Unfortunately, there was never an opportunity to perform system performance assessments because the necessary CDC contacts were no longer available and the CDC consultants responsible for receiving data were no longer responsive to our multiple requests to proceed with testing and

evaluation.

The VAERS system is mostly kept a secret; most people don't link vaccine injuries to vaccinations because of the indoctrination that vaccines could never cause harm. If a person gets a vaccine against influenza and gets a heart stroke the next day, he and his doctors will consider the vaccine unrelated and successful as he did not get influenza the next day.

In her testimony to U.S. House Government Reform Committee in 1999, Barbara Loe Fisher, co-founder and president of the National Vaccine Information Center and co-author of *Shot in the Dark* said:

"Former FDA Commissioner David Kessler estimated in a 1993 article in the *Journal of the American Medical Association* that fewer than 1 percent of all doctors report injuries and deaths following the administration of prescription drugs. This estimate may be even lower for vaccines. In one survey that our organization conducted in New York in 1994, only 1 doctor in 40 reported to VAERS..."

<http://www.whale.to/vaccines/fisher.html>

From *Vaccine-Nation*:

"Doctors and hospitals are very reluctant to blame vaccines for the sudden onset of disease or death. They still consider vaccination to be the greatest medical achievement of all times. Besides, it is not good PR to admit that the medical treatment is responsible for causing brain damage or death. Blaming accidental occurrence of disease instead of vaccines on these side effects automatically works as a waiver of liability that extends to all acts of negligence." (p.28)

In regards to the COVID vaccine, from the start of vaccination through August 14, 2021 the European database reported 21,766 people dead and 2,074,410 vaccine injuries, and the US VAERS database reported 12,791 dead and 682, 873 injured through August 14, 2021.

<https://healthimpactnews.com/2021/21766-dead-over-2-million-injured-50-serious-reported-in-european-unions-database-of-adverse-drug-reactions-for-covid-19-shots/>

With the Harvard data on VAERS (1% reporting), that would mean 127,910 dead just in the US from the vaccine, way more deaths than the COVID-19 illness.

But sometime in August this 12,000 number of deaths was lowered by the CDC, as they claimed it was a mistake.

https://www.theepochtimes.com/spike-in-death-reports-following-covid-19-vaccination-an-error-cdc_3911934.html

However, this video shows evidence that 150,000 cases have been deleted from VAERS.

Video: Primitive Christian News: CDC Is Deleting (DATA) From VAERS (bitchute)

<https://www.bitchute.com/video/ZAFSHx8KU7xS/>

He goes on to show how 150,000 have been deleted...

In Brazil, 32,000 have been reported dead from the vaccine.

<https://healthimpactnews.com/2021/over-32000-people-dead-in-brazil-following-covid-19-vaccines-according-to-official-media-report/>

What also proves the existence of vaccine injuries is the 1986 National Childhood Vaccine Injury Act, which established a no-fault compensation system for vaccine-related deaths and injuries called the National Vaccine Injury Compensation Program. This gave legal immunity to all vaccine companies—after they were being sued too much directly and were facing bankruptcy. If vaccine companies were liable, they would be out of business.

In July 2020, Andrew Wakefield came out with the film *1986 The Act* about the corrupt legislation.

Video: 1986: The ACT (Official Trailer)

<https://youtu.be/AKUwnRrueU>

Vaccine courts compensate victims with American tax dollars and ensure that victims will not discuss their case with mainstream media.

This article by Robert Moxley, a former vaccine attorney discusses how “families were cruelly oppressed,” and how the process was “rigged... in favor of the vaccine-industrial complex.”

<https://www.theamericanconservative.com/articles/the-vaccine-court-is-hazardous-to-your-health/>

A state of symbiosis arose between the agency tribunal and the public health bureaucracy. These sister agencies appeared to regard families of the injured as criminals, trying to steal the government's money. The vaccine court quickly developed an institutional hostility toward doctors and scientists who dared to challenge the orthodoxy of vaccine medicine. Doctors willing to help petitioners were criticized for being too eager to “blame” the vaccines. An unspoken premise is ever-present: to acknowledge vaccine injury is to undermine public acceptance, and to threaten “herd immunity.” The public health agenda is the tribunal agenda and the DOJ agenda as well.

Video: *Mom fights to improve vaccine injury program after daughter's death*

https://youtu.be/2nuXE2FS_NU

Reporter: "Kane is an anti-vaxxer. Her daughter Lauren lived with daily debilitating seizures for fifteen years after receiving a bad DPT vaccine as a newborn.

Kane: “And it was full of mercury. The vaccine destroyed her brain.”

Reporter: “Kane will never get what she really wants, her daughter healthy and back in her arms. But through the Vaccine Injury Compensation Program, or VICP, she did get reimbursed for medical bills and money to stay home and care for her daughter. The process took years.”

Kane: “I was treated horribly in vaccine court, horribly.”

Reporter: “But at least Kane got to go to court and if denied she could appeal. Anyone injured by the Covid Vaccine won't have those opportunities. That's because the Department of Health and Human Services has decided to use a different program. I'm extremely concerned about the countermeasures program.”

According to the government's own documents \$4.6 billion has been paid out and 33% compensated out of around 24,000 petitions.

<https://www.hrsa.gov/sites/default/files/hrsa/vaccine-compensation/data/data-statistics-report.pdf>

Most of these cases are autism! Despite the definitive proof of vaccine harm in these strict and biased courts, no scientific investigation is done as vaccine dogma must remain.

Medical doctors only receive a few hours of vaccine indoctrination.

WHO Global Vaccine Safety Summit 2019 Professor Heidi Larson

<https://www.bitchute.com/video/6Hj8jC0PSc4V/>

Larson: "I mean most medical school curriculum's even nursing curriculum's, I mean in medical school you're lucky if you have a half day on vaccines, never mind keeping up to date with all this."

A doctor's livelihood and reputation is dependent on how well they comply to vaccination dogma. They are punished for not getting a certain percentage of their patients to obey the CDC vaccination schedule. Doctors have also become the salespeople for the drug companies and will have a better lifestyle for joining the political-corporate power structure.

While the medical literature is full of all the problems with vaccines, most doctors do not have time to go through the material and are so biased against it to even consider it.

You can find over 160 research papers supporting the vaccine/autism link.

<https://www.scribd.com/doc/220807175/160-Research-Papers-Supporting-the-Vaccine-Autism-Link>

Article: *Public should be told that vaccines may have long term adverse effects*

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1114674/>

The CDC recommends that a child get 74 vaccines before they are 17 years of age and that is mandatory in the California and New York public school system allowing no religious exemption and only extremely strict medical exemptions; this will soon extend to all states as in 2019, Congress passed the Vaccinate All Children Act that will require all students in all public schools get vaccinated according to the CDC vaccine schedule.

<https://www.congress.gov/bill/116th-congress/house-bill/2527>

Is the Childhood Vaccine Schedule Safe?

<https://www.nvic.org/CMSTemplates/NVIC/pdf/49-Doses-PosterB.pdf>

Now the CDC has an adult vaccine schedule consisting of up to 40+ shots as mandatory adult vaccines are coming down the pike.

<https://www.cdc.gov/vaccines/schedules/hcp/imz/adult.html>

The one-size fits all approach is ludicrous as an infant, pregnant woman, and 250lbs man get the same dose and any preconditions or illnesses don't matter.

<https://www.naturalnews.com/2018-10-30-vaccines-one-size-fits-all-absurdity-failed-logic.html>

The CDC recommends the covid-19 shots for people who are immuno-compromised.

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/immuno.html>

Why are sick and vulnerable people being vaccinated??

Dr. Suzanne Humphries became awake of the vaccine agenda when her sick and dying patients were being given vaccines against her orders not to as she had seen first hand debilitating effects from these vaccines.

Series by Dr. Suzanne Humphries

<https://youtu.be/cLrqmvjrjil>

Dr. Humphries: "Back to my real world as a newly trained doctor. Little did I know that what I was taught about vaccines and immunity meant that I had absolutely no idea what I was talking about, and left me blinded when confronted with the real world... And this is still the case for the majority of medical professionals today who are at the front line patient care."

"I knew nothing about vaccine manufacture, contents, risks, or history. After being handed the schedule of vaccines for kids during my pediatric rotations, I was told to give them on time and that was the extent of my knowledge... As a nephrologist, I gave hepatitis B vaccines to dialysis patients. Their immune systems don't respond very well, so we often had to give them numerous injections of high dose aluminum vaccines, which is an enormous aluminum load. I gave flu shots, pneumonia shots, all per dialysis protocol, never considering any potential problems. Nothing was linked to vaccines in my mind, until one patient in 2009 volunteered to me, "I was fine until I had that flu shot," and I thought well that can't be. But the other doctors and I could find no alternative cause... Until 2009, I had never once considered vaccines as a potential threat to kidney health."

"This was my sentinel case, a man who had normal kidneys documented by blood work prior to December then was vaccinated in his doctor's office and came to the hospital and renal shutdown two

weeks later. He required dialysis for about three weeks and then was taken off of dialysis but as kidney function only returned to about seventy percent. I want to show you a sampling of some other cases that I made record of after that first eye opening event when I began to ask a simple question when was your last vaccine?" (skipping ahead)

"In 2001, I was idealistic and naive. I thought those involved in policy-making, especially the ones whom I knew for years, would want to do what is best for patients over and above what policy dictated. How wrong I was. The hospital policy was to vaccinate as many patients as possible on the first hospital day... And I decided to speak to the hospital management about what I was seeing. One day in the corridor, I bumped into the Chief of Medicine. He asked me how things were going and I detailed my concerns to him, and according to him I was the only doctor seeing these problems. He kept responding as if the science was settled. I got the full on historic justification, 'Oh but vaccines have eradicated smallpox polio, polio, meningitis,' as if that had any relevance to vaccinating sick adults, some of whom were at death's door in the hospital. So I put my concerns in writing and meetings were held to discuss the issue but I wasn't invited to those meetings. The result? I was told that acutely ill inpatients would continue to be offered vaccines on arrival at the hospital. I asked myself exactly what is the science that says that these vaccines are safe for really sick people? There must be studies on the subject and writings in the medical literature in order for these doctors to be so sure of the rightness of their policy... After all, it's science we're talking about, isn't it? I submitted a written report to the administration. In my research, I found that aluminum in vaccines is a documented cause of granuloma formation, something I've been familiar with for years."

"Aluminum and mercury given together have synergistic toxicity. My patients who received flu shots and pneumonia shots would have received both. Can patients be assured that the renal interstitial granular ominous or auto immune illness is not due to the aluminum or molecular mimicry from a previous vaccine? Moreover, I found that my patient population with acute and chronic illness had barely been tested for vaccine efficacy, safety, or long term consequences. So the answer of course is no, patients cannot be assured of safety."

"Some documented ill effects of vaccines upon kidneys include autoimmune kidney disease, vasculitis, thrombotic thrombocytopenic purpura, and aluminum mediated granuloma issues... So I discussed all this evidence for over a year with the administration and with my various colleagues. Other doctors were starting to change their previously set minds and a high number of nurses were catching on. But then because the hospital administration could not rebut my arguments, they called upon an expert to set me straight. He never addressed any of my questions regarding acute kidney patients or acutely ill new admissions."

"The executive committee of my hospital also told me that it was not appropriate for me to stop vaccination orders on my patients and that I was confusing the nursing staff. I thought how bizarre, nurses are never used to the same treatment plan for all patients ever. My experience was not one of confusing nurses at all but of finding other vaccination critical people on the hospital staff who agreed with me. After I left the hospital, this article by Duggal came out, as have several others, which implicate flu shots in the genesis of autoimmune and vascular diseases... And just last month I got a note from a woman whose spouse with kidney disease who was very stable died at home one day after receiving two vaccines. She was extremely distressed and I had no comforting words for her. Since leaving the hospital in 2011, more literature has been published besides Duggal that supports my hypothesis and my experience that common and difficult to treat kidney diseases can be caused and worsened by vaccine ingredients."

Now, some doctors who have not let their beliefs bias their perceptions have keenly observed marked differences between vaccinated and unvaccinated individuals.

Take for example, what Thomas Cowan, doctor of a San Francisco clinic saw, relayed in his book *Vaccines, Autoimmunity, and the Changing Nature of Childhood Illness*, 2018:

"I rarely saw an unvaccinated child in my practice with a chronic illness or any sort. In general, these children ate healthy diets, played outside a lot, and were in good health. However, among the patients who were partially or fully vaccinated because they had seen other physicians or pediatricians in the past, I treated many who had one or more chronic health conditions, including asthma, eczema, seizures, and digestive disorders. As time went on, all of these disorders become more common among the partially or fully vaccinated children I saw. I believe this corresponded with the introduction in the late 1980s to the mid-1990s of certain adjuvants and excipients, as well as the introduction of

ever more vaccines.”

My New Hampshire practice also afforded me the opportunity to treat some of the illnesses for which most children are routinely vaccinated. I have seen hundreds of cases of whooping cough (including my three children); hundreds of cases of chicken pox; approximately fifty cases of measles; one case of tetanus; about twenty cases of mumps; a few cases of German measles; no diphtheria; no meningitis; no cases of paralytic polio; and no new onset cases of hepatitis B. Two children in my care were hospitalized as a result of these illnesses: one from complications of chickenpox and one for tetanus. As far as I know, all of the children, including the two who were hospitalized, emerged alive and well, with no long-term complications as a result of their illness.”

A few decades later, not only is it common for families to have at least one member who's being treated for a chronic illness, but also autism, learning disabilities, asthma, and food allergies have exploded in their frequency and severity. For example, approximately; 1 in 2.5 children has an allergy, 1 in 6 children has a developmental disability, 1 in 9 children has attention-deficit/hyperactivity disorder (ADHD), 1 in 11 children has asthma, 1 in 13 children has severe food allergies, 1 in 36 his autism.

These numbers represent a national emergency.” (p.14)

Video: Dr. Thomas Cowan | The Misconceptions of Illness

<https://www.youtube.com/watch?v=80uAU7ywLP0>

This brings us to the question:

Have there been studies comparing the general health outcome between the vaccinated and unvaccinated? While this has been requested to Congress, it has never been done and the CDC refuses to ever do such a study.

Video: Dr. Larry Palevsky M.D. Talks about how there are no studies comparing vaccinated with unvaccinated.

<https://www.youtube.com/watch?v=vg6Sm3NqYGo>

Dr. Lawrence Palevsky: Now as a medical doctor who was taught to think I then went into the literature and said are are proper science studies done, safety studies where you take a vaccine and you injected into a hundred kids and then you give a hundred kids a saline placebo, meaning it's inert. No study exists to actually evaluate the safety of a vaccine compared to a placebo group. None.

Despite public health authorities refusing this study, several independent studies have been done comparing the vaccinated with the unvaccinated.

Article: Studies Outside the U.S. Show Unvaccinated Children Healthier than Unvaccinated Children
<https://healthimpactnews.com/2014/studies-outside-the-u-s-show-unvaccinated-children-healthier-than-vaccinated-children/>

In 1992, a study done by New Zealand found that vaccinated children had a higher percentage of asthma, eczema, chronic otitis, tonsillitis, shortness of breath, and hyperactivity.

<https://www.vaccineinjury.info/images/stories/ias1992study.pdf>

In 2011, this German study was published: *Vaccinated Kids Have 2 to 5 Times More Diseases Than Unvaccinated Ones*. The data was based on 8000 cases from parents with vaccine-free children compared with the general vaccinated population.

<http://mnhopkins.blogspot.com/2013/01/vaccinated-kids-have-2-to-5-times-more.html>

This 2000 study: *Routine Vaccinations and Child Survival: Follow up Study in Guinea-Bissau, West Africa* found that the death rate was twice as high in the vaccinated children against diphtheria, tetanus, and whooping cough as the unvaccinated.

In 2017, the Journal of Translational Science published a Pilot *comparative study on the health of vaccinated and unvaccinated 6-to12-year-old U.S. Children* comparing 261 unvaccinated with 405 partially or fully vaccinated.

<https://electromedicine.org.au/wp-content/uploads/2020/05/JTS-3-186.pdf>

<http://info.cmsri.org/the-driven-researcher-blog/vaccinated-vs.-unvaccinated-guess-who-is-sicker>

The results showed an increased risk of many diagnoses among the vaccinated children including allergic rhinitis (30.1), learning disabilities (5.2), attention deficit hyperactivity disorder (ADHD) (4.2), autism (4.2), neurodevelopmental disorders (3.7), eczema (2.9), and chronic illness (2.4). The increased risk of neurodevelopmental disorders appeared to be higher in cases of preterm births.

Vaccinated children were 340% more likely to be diagnosed with Attention Deficit Hyperactivity Disorder than unvaccinated children!!

In May 2020, Brian Hooker and Neil Miller found that vaccinated children had an increase in odds ratio in developmental delay, asthma, and ear infection compared to unvaccinated children in a study using three practices.

Analysis of health outcomes in vaccinated and unvaccinated children: Developmental delays, asthma, ear infections and gastrointestinal disorders

<https://journals.sagepub.com/doi/full/10.1177/2050312120925344>

Recall that Brian Hooker was the scientist who blew the whistle on William Thompson's admission to CDC fraud regarding the MMR vaccine and autism.

Relative Incidence of Office Visits and Cumulative Rates of Billed Diagnoses Along the Axis of Vaccination

<https://www.mdpi.com/1660-4601/17/22/8674/htm>

In November 2020, Dr. Paul Thomas, owner of a pediatric practice in Oregon teamed up with an expert in experimental design, research scientist James Lyons-Weiler, to perform a comparison study (above) in Dr. Thomas' own clinic with children who have been with him since the beginning of their life. The study was on 3,324 pediatric patients of D. Thomas exclusively for a 10 year period in which 2,763 received at least one vaccine and 561 children did not receive *any* vaccines. They compared the number of doctors visits with three groups, the unvaccinated, the vaccinated, and the partially vaccinated.

They write:

We have found higher rates of office visits and diagnoses of common chronic ailments in the most vaccinated children in the practice compared to children who are completely unvaccinated. The data clearly show different odds of developing many of these adverse health conditions.

The data revealed that even those partially vaccinated were more sick than unvaccinated children.

Video: Dr. Paul Thomas Targeted (shows charts at 25 minutes) with Spiro Skouras

<https://www.bitchute.com/video/vsjeMtEFasaP/>

Dr. Thomas: "Look at what the data shows, I think for your viewers probably put this image up."

Spiro: "Yes absolutely."

Dr. Thomas: "Yeah so this is like sort of a key graph visually. You see in the orange lines which are the ones that kind of skyrocket are the various conditions that... those are the vaccinated kids, terribly vaccinated children and the blue line are the unvaccinated children, and then the timeline is is over those ten years, and as your vaccine uptake increases. And you just see dramatic increases in asthma, allergies, breathing, problems behavioral issues, ADD/ADHD, respiratory infections, other infections like ear infections, eye infections, eye disorders, the skin disorder like eczema which we think of as allergic, dermatitis, urticaria (itchy rash) and anemia was a surprise finding. And you can see it just skyrockets at one point in time. Well that's because in pediatrics we checked for anemia at nine months, it's just standard. And I was shocked to see that the unvaccinated pretty much [had nothing], I mean a little tiny blip of anemia. It's the vaccines, period. I mean there it is. So we've got theories for that and that might be another paper. But we can no longer say [it's not the vaccines] with the significance of this data, it's a large enough sample size to have [certainty]... Jack Lyons-Weiler, who helped with a lot of the analysis, he doesn't even like P values, [says] ah that's junk. Yeah, I'm an

old school statistics [guy], into the simple stuff, and I said, well do the P values. I want to see them, right. And, uh they're off the charts! You know, most studies are published with a P value point zero one and you go, whoa that's so significant. And we have P values of point zero zero zero zero one! That kind of thing, where its like there's no way this is by chance. So I think we have answered the question, at least in my practice if you do things the way I do them in my practice, vaccines clearly cause harm and not vaccinating or vaccinating less clearly has health benefits."

Because of this study, the Oregon state revoked Dr. Thomas' medical license and a book has been written about the subject.

<https://www.activistpost.com/2020/12/dr-paul-thomas-targeted-by-medical-board-media-after-landmark-vaccine-study-interview.html>

We have seen direct science papers confirming a connection between vaccines and these illnesses:

Hepatitis B Vaccine Linked to Onset of Diabetes

<https://www.webmd.com/diabetes/news/20000613/hepatitis-b-vaccine-linked-to-onset-of-diabetes>

Childhood vaccinations and risk of asthma

<https://pubmed.ncbi.nlm.nih.gov/12182372/>

Evidence that Food Proteins in Vaccines Cause the Development of Food Allergies and Its Implications for Vaccine Policy

<https://www.longdom.org/open-access/evidence-that-food-proteins-in-vaccines-cause-the-development-of-foodallergies-and-its-implications-for-vaccine-policy-2329-6631-1000137.pdf>

What does the CDC *mean* by "safe and effective"?

In this presentation, Dr. Sheri Tenpenny discusses how safety studies are not properly done from her research on vaccines beginning in 2000.

Video: *Vaccination: What the CDC documents and Science Reveal* by Dr. Sheri Tenpenny (2003)

<https://www.youtube.com/watch?v=M1VwVBmx0Ng>

Tenpenny: "Well, how the heck did I get into, interested in vaccinations? Because who I am is is a classically trained physician. I'm board certified in emergency medicine. I practice in emergency department for twelve years and not only was I an emergency room physician, I was the director of the ER, the President of our ER corporation, and I ran a three county EMS, and I set up a three county mental health transportation system that involved the sheriff's department, the police department, and the state highway patrol. So not only did I do every conventional thing that you can imagine in terms of conventional medicine, but when I was an ER doc, I used to hand out tetanus shots like they were some special form a candy."

"Well it was in September of 2000, I had the opportunity to attend the National Vaccine Information Center meeting in Washington DC. And at that point, I went in and I sat for four days listening to a meeting and I just couldn't even believe my ears. I mean I'm rather an information junkie and I read a lot and I study a lot and this whole area of medicine was totally new to me. How did I miss this? Well it just became such a fascination for me because I thought, well if all these people standing up here with big credentials and really seem to be very knowledgeable are speaking out against vaccines maybe that's something that I ought to take a look at. So figuring that the best defense is a good offense, I thought that best place to start was to go to the CDC. Now the CDC is the Center for Disease Control, and they are what we call the highest law in the land when it comes to vaccines... So when I started going to the CDC Documents, I decided that I didn't really have to look many other places because there was so much information in there that it was not known to doctors, not known to the general public, and really showed that vaccines did cause a lot of damage and that there was a real reason for concern... So after about the last three years of just spending all of my extra time, I mean my friends who know me say know you have no life because I spend all my evenings reading CDC documents and so I do that because I'm very passionate about this topic. I believe that we really need to know more about this; I'm very passionate about the vaccine injured children that we treat our clinic; and I'm very passionate to do something to get the information out to stop the tide of what's happening in this country in terms of vaccine injury."

She informs us that their safety studies do not use double blind placebo controls (which would be testing the vaccine against a saline solution), but they merely compare one vaccine to another vaccine or to the vaccine adjuvant. They only use healthy people—and yet recommend or mandate the vaccine to be administered to the sick or immuno-compromised; and data can easily be changed or eliminated if the investigator wants to (this is discussed at 14 minutes).

Tenpenny: “Serious side effects can be negated simply with the stroke of a pen. And here's two examples that I'm going to read some to you, a little bit out of a study, because I think that this makes a very big important point, is that when safety studies are designed if the conclusions are not in line with what they-- if there's any data that's not in line with the conclusions, then what ends up happening is that it's just negated. So here's a study that they used, 882 healthy infants, there's that healthy infant part again, to compare Combax, a new vaccine that had the hib and the hepatitis B in it, they gave them to some and then the other ones they gave the hib and the hepatitis B in two separate shots. So they're comparing a new combination vaccine in one vile compared to two separate shots. That's what's considered the design of the safety study. As they go through this, during the study there were 17 children, or nearly two percent that had events within fourteen days of vaccination that met defining criteria of a serious adverse experience. These included seizure, diarrhea, vomiting, dehydration, bronchiolitis, tachypnea, which is really rapid breathing, pneumonia, reflux esophagitis, and vitreous hemorrhage, which is bleeding in the back of the eye. Virtually all of these experiences were classified as serious because they involved hospitalization. None was judged by the study investigators to be caused by the vaccine.”

Trials are usually done for just a few days as there are no long-term studies of effects.

Most vaccine safety studies are performed by the vaccine company itself. While the CDC does some studies, it is also biased towards approval as the CDC is a vaccine company, having over 20 vaccine patents and selling about \$4.6 billion vaccines per year.

Article: *CDC is a Vaccine Company, Not An Independent Agency*

<https://steemit.com/vaccines/@canadian-coconut/cdc-is-a-vaccine-company-not-an-independent-agency-revealed-by-activist-robert-f-kennedy-jr>

From *Vaccination Nation: The Dangerous Truth About America's "Slow Kill" Agenda:*

“The CDC spends \$1 billion promoting and pushing vaccines, while spending only \$30 million on safety testing. If nothing, else, this shows where their priorities lie.” (p.29)

https://www.lakelandchiro.net/app/download/7048396604/Vaccination_Nation.pdf

As a side note, 50% of the EPA's funding also comes from vaccines.

Dr. Tenpenny exposes how the CDC goes so far to blatantly state that any adverse reactions that occur after taking a vaccine are caused by either another illness and/or a genetic defects of the child. (1:10 hr. mark).

Tenpenny: “Now what does the CDC say about all these reactions? I mean we've talked about all the side effects, all those stuff with the hepatitis B and the side effects of the chicken pox vaccine. What do they really say in their literature about this? This is a mantra that you hear over and over again: 'temporal association does not prove causality.' And what that means, in plain language, is that when two things happen at the same time you can't prove that one caused the other... So what if you have a really bad reaction because we know that this happens. I mean we even set up the National Vaccine Injury Compensation Program where people are supposed to be able to go and get money, if they have a vaccine injury. Who are we supposed to blame for this? Well... it's not the vaccine because we write all those things out, it can't be that, and it's really not the doctor because the doctor through the Vaccine Injury Compensation Program is absconded from liability. And the manufacture can't be sued because of the Vaccine Injury Compensation Act. And the government isn't responsible because they don't--you can't sue the government anyways. We'd all like to, but you really can't. So what happens? Well, in conventional thinking, the way conventional medical doctors think about this is that the vaccine injury must have triggered, summoned that inevitable thing that happened and that these children had some sort of a weakness that was manifest--would have been manifested in this way at this point with or without the vaccine. So who takes the hit? The genetically defective child... This actually comes from the CDC: 'that there is no distinct syndrome from vaccine administration and therefore many temporally associated adverse events probably represent background illness rather than illness caused by the

vaccine.”

Here is a statement by the CDC to push plausible deniability when the illnesses that the vaccine was designed to prevent occur.

“... it is possible that a person infected with a disease just before or just after vaccination could develop symptoms and get a disease, because the vaccine has not had enough time to provide protection.”
https://www.cdc.gov/vaccines/hcp/conversations/downloads/vacsafe-understand-color-office.pdf?fbclid=IwAR1n8hXXk_ZJtbiu7yfGW9sUililsK68HVgASBrFQreMogRqlcyP8bVtBFY

Dr. Tenpenny discusses how there is a conflation between the terms vaccination and immunization, as they are not the same. “Research efficacy” and “clinical efficacy” are also conflated in the same way. Vaccination and research efficacy mean that the vaccine created an immune response (through antibody detection), whereas immunization and clinical efficacy means that one has immunity towards a disease. These terms are deliberately confused so that people think that vaccination means that you are immune to a future disease.

In order to validate the latter (immunization), one would have to do studies exposing test subjects to the wild virus post-vaccination. This is rarely done but in very few animal studies that are extremely short term term.

Nonetheless, an immune response from a vaccine is considered to make that vaccine effective against disease when an immune response can be deadly. But many studies will flat out admit that the vaccine doesn't provide protection against a disease (Dr. Tenpenny discusses at 20-25 minutes).

Tenpenny: “And what about smallpox? And this came from a JAMA article back in 1999, and it said that neutralizing antibodies are reported to reflect levels of protection although this has not been validated in the field. So you can get antibodies but we really don't know if this is going to protect you or not.”

“And this came from a research interview from Dr. John March from the Morton Research Institute in Scotland where they do a lot of investigation and animal studies, primarily with vaccines and animals. And what he said in that in that interview was 'particularly for viral diseases, the cellular immune responses is all important; Antibody levels and protection are TOTALLY UNCONNECTED.' So this is something that we kind of know, but it's not anything that we put into practice. We really do believe that 'effective' means 'clinical protection' and those two things just like vaccination and immunization aren't synonyms, neither are vaccination and antibody production synonymous with protection.”

By the age of six, following the CDC schedule, children will have 49 doses of 14 vaccines starting on the day of birth. A child can receive more than eight vaccines in one visit. There are no safety studies on multiple vaccine injections, whether that be in one day or over the course of years.

According to a 2013 report by the Institute of Medicine:

“... the concept of the immunization schedule is not well developed in the scientific literature... Key elements of the immunization schedule—for example, the number, frequency, timing, order, and age at the time of administration of vaccines—have not been systematically examined in research studies.”
https://www.ncbi.nlm.nih.gov/books/NBK206948/pdf/Bookshelf_NBK206948.pdf

Now in 2009, the Kobe University of Japan vaccinated different animals with multiple vaccines (not using toxic adjuvants but just the viral antigens) and found that:

“Systemic autoimmunity appears to be the inevitable consequence of over-stimulating the host's immune system by repeated immunization with antigen, to the levels that surpass system's self-organize criticality.”

Self-Organized Criticality Theory of Autoimmunity

<https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0008382>

Suppressed Study Shows Vaccine Dangers: Vaccination Stimulate Autoimmune Diseases

<https://naturalsociety.com/suppressed-study-shows-vaccine-dangers-autoimmune-diseases/>

In the book *Natural Alternatives to Vaccination*, Dr. Zoltan Rona says:

“Studies are increasingly pointing to the conclusion that vaccines represent a dangerous assault to the immune system leading to autoimmune diseases like Multiple Sclerosis, Lupus, Juvenile Onset Diabetes, Fibromyalgia, and Cystic Fibrosis, as well as previously rare disorders like brain cancer, AIDS, childhood leukemia, autism, and asthma.”(image)

This article *Induction of Autoimmune Diseases Following Vaccinations* discusses a list of reactions.

https://www.researchgate.net/publication/287984183_Induction_of_Autoimmune_Diseases_Following_Vaccinations_A_Review

When a person is put on new medication, he is usually monitored by a doctor, but with vaccines that admittedly have toxic substances, there is no follow-up to see if the body recovered from the infection or if all the toxins were purged from the body or if an autoimmune response has occurred; the vaccination is completely ignored as a contributing factor for any future medical issue.

We just keep adding vaccines to the list as Big Pharma propagandist Paul Offit claims that children could be safely injected with 10,000 vaccines in his book *Deadly Choices*.

In previous parts of this series we have learned that viruses adapt and combine to make more virulent strains as performed by gain-of-function studies and serial passaging.

Dr. Tenpenny (near the 1:30 hr. mark) discusses a 1986 animal experiment that revealed how combining viruses can create more virulent recombinants through the act of vaccination. (I couldn't find the original study.)

Dr. Tenpenny: "The known physiological effects of vaccines is that viruses can lay dormant. They can be latent and there's a process called transcession, in which one virus can marry another virus, and then they can be combined and be totally something different. And this is what actually happened. This is a really great study. I'm going to walk you through here... that a hundred part - - that this was done, it was a mouse study and they use viruses in mice. They used a hundred particles of a benign herpes virus and they put it into the first mouse and nothing happened. The mouse was just fine. They took a hundred particles of a second type of virus, virus B, and they put it into a second mouse, nothing happened. The mouse was fine. They took one particle of each of these, one unit particle of each of those, put it into the third mouse. The mouse dies. And not only that, when they did the autopsies on the mice, they found eleven new recombinant types of viruses and three were lethal to the next generation. Though if we could get totally pure measles, mumps and rubella that was nothing more than absolutely the measles virus, and absolutely just mumps, and absolutely just rubella, and absolutely just chicken pox, we're still combining four viruses together, one that when kids go in and get MMR and chicken pox. But we know just from the little science stuff that we just went through how they create these vaccines is by using these different avian serum and bovine serum, all these things... so what are we creating is kind of like we don't know."

"And the conclusion of this study was that two avirulent viruses, two benign viruses, they interact in vivo which means in living tissue to come to produce virulent combinations that can be lethal. This came from Science magazine 1986."

Many studies have shown that vaccination produces more virulent strains of pathogens. Injecting viruses into a living being should be seen as an *in vivo* experiment as viruses can mutate and adapt to the cells and proteins in the body in unpredictable ways; thus it should be no surprise that vaccines are "pushing pathogens to evolve."

Vaccines Are Pushing Pathogens to Evolve

<https://www.quantamagazine.org/how-vaccines-can-drive-pathogens-to-evolve-20180510/>

Pennsylvania State University discovered that malaria vaccines created more virulent strains that could be passed to the unvaccinated.

<https://news.psu.edu/story/147680/2012/08/01/more-virulent-malaria-parasites-evolve-when-vaccine-used>

Likewise, in 2015, a study with 100 chickens showed that vaccinated chickens had shed a more virulent strain of the virus that could also be passed to the unvaccinated.

<https://journals.plos.org/plosbiology/article?id=10.1371/journal.pbio.1002198>

On March 6, 2021, Geert Vanden Bossche, independent virologist and vaccine expert, formerly employed at GAVI and The Bill & Melinda Gates Foundation wrote a letter to the WHO warning them that the administration of the Covid-19 vaccine during a pandemic could cause a global catastrophe.

https://37b32f5a-6ed9-4d6d-b3e1-5ec648ad9ed9.filesusr.com/ugd/28d8fe_266039aeb27a4465988c37adec9cd1dc.pdf

Bossche has said that “there can be no doubt that continued mass vaccination campaigns will enable new, more infectious viral variants to become increasingly dominant and ultimately result in a dramatic incline in new cases despite enhanced vaccine coverage rates.”

<https://childrenshealthdefense.org/defender/pfizer-ceo-albert-bourla-variant-specific-covid-vaccine/>

Luc Montagnier (Nobel Prize winner for HIV discovery) claims that vaccines are creating the variants. <https://www.santabanta.com/newsmaker/7072/bombshell-nobel-prize-winner-reveals-covid-vaccine-is-creating-variants/>

Clip of Montagnier in this Press for Truth video: <https://www.bitchute.com/video/r00jL0Kuf6nr/>

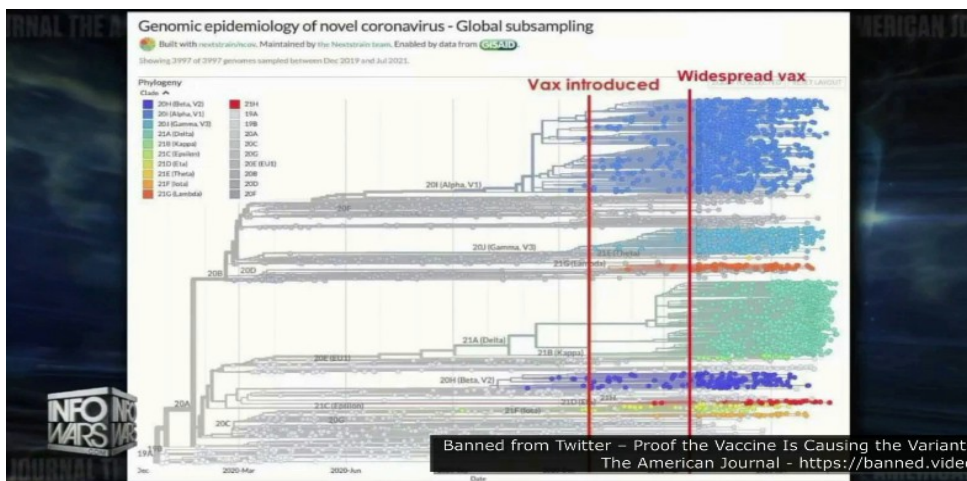

Interviewer: “How do you view the mass vaccination program?”

Montagnier: “A scientific error, as well as a medical error. It is an unacceptable mistake. This history books will show that, because it is the vaccination that is creating the variants. For the China virus, there are antibodies, created by the vaccine. What does the virus do? Does it die or find another solution? The new variants are a production and result from the vaccination. You see it in each country, it's the same: the curve of vaccination is followed by the curve of deaths.”

Months later, we are dealing with the delta virus being spread by the vaccinated, breakthrough covid cases in those vaccinated, and more viral epidemics in general.

Banned from Twitter – Proof the Vaccine Is Causing the Variants <https://banned.video/watch?id=612e61bf4ac9577b5b00e1a8>

Reporter: “So very very interesting. Here pretty much visual form shows, fairly obviously, that vaccines are directly related to the number of variants there are. In other words, the more people vaxxed, the more variance you get. Now, the person who put this chart on Twitter was suspended the very next day.”

CDC says vaccinated people can spread the delta variant.

<https://www.thelancet.com/journals/lanres/article/PIIS2213-2600%2821%2900075-8/fulltext>

COVID-vaccinated Can “Shed” Spike Protein, Harming Unvaccinated

<https://principia-scientific.com/covid-vaccinated-can-shed-spike-protein-harming-unvaccinated/>

The Unvaccinated Are Not Fueling COVID Variants

<https://undercurrents723949620.wordpress.com/2021/07/20/the-unvaccinated-are-not-fueling-covid-variants/>

Now, vaccine companies want to make vaccines for these variants, also called top-off vaccines.

In April of this year Former Vice President of Pfizer, Michael Yeadon has come out to warn about the fraud of using the issue of variants to create more vaccines, claiming that this could only be a mass depopulation program.

Michael Yeadon Interview

<https://rumble.com/vg4inv-michael-yeadon-full-interview-planet-lockdown.html>

Yeadon: “So of the things that your governments and advisers have misled you about, I think most severely, and honestly frightens me and is the catalyst for me making these recordings, is the issue of virus variants and the following issue -- the related issue of top-up vaccines or variant vaccines. When your government scientists tell you that a variant that's zero point three percent different from SARS could masquerade as a new virus and be a threat to your health, you should know and I'm telling you they are lying. If they're lying and they are why is the pharmaceutical industry making top-up vaccines. They are making them. You should be terrified at this point as I am, because there's absolutely no possible justification for their manufacture... I'm very frightened of that. There's no possible benign interpretation of this. I believe that they can be used to damage your health and possibly kill you. Seriously, I can see no sensible interpretation other than a serious attempt at mass depopulation. This will provide the tools to do it and plausible deniability because they'll create another story about some sort of biological threats and you'll line up and get your top-up vaccines, and a few months or a year or so later you'll die of some peculiar inexplicable syndrome, and they won't be able to associate it with the top-up vaccine.”

That's all for now; stay tuned for Part 11...as we will look into vaccine history and myths such as the myth that “vaccines save lives” and “cured small pox and polio”... and we will also get to the bottom of vaccine theory, germ theory, terrain theory, and natural immunity and discuss an *occulted* underlying mechanism behind vaccine disease and the effects of bioterrorism... and in Part 12 we will go into the big picture and more into the psychological and philosophical aspects of this multi-dimensional war we are in.
